

## **Synopsis of Pilot testing Scenario**

**Organization:** Florida Department of Transportation

**Description of transportation network:** There are 135 centerline miles of principle arterials in Central Florida where real time travel times are calculated from reading and matching toll tags. This data is used in the area's 511 information network.

### **Primary Point of Contact:**

Name: George Gilhooley

Title: Manager of Strategic Operational Initiatives

Phone Number: 386-804-6536

Email: [george.gilhooley@dot.state.fl.us](mailto:george.gilhooley@dot.state.fl.us)

### **Performance Measures being tested:**

- Extent of Congestion (Spatial)
- Extent of Congestion (Temporal)
- Travel Time (facility)
- Travel Time – Reliability

### **Brief description of the pilot test:**

Fifteen minute summary data will be used from all of 135 centerline miles of the network. In addition one minute data will be utilized from the SR 50 corridor
